

## **Retro-Commissioning Engineer Berkley, Michigan**

As a Commissioning Engineer with Energy Sciences, you will join our team of degreed and licensed engineers, scientists, and efficiency professionals to meet the energy use challenges of commercial buildings and industrial processes. We are looking for experienced and talented technical team members to assist our clients, from small businesses to Fortune 500 companies, identify energy-savings opportunities, reduce waste, and save money. You will play a key entrepreneurial role on a team in an exciting, start-up environment that is dedicated to driving our vision of a sustainable and socially responsible energy future.

### **About you**

- Collaborative, enterprising individual who likes to work in an open team environment
- Excited about challenging the status quo and offering creative ideas for growth
- Self-motivated and able to work with autonomy and independence
- Able to make quick and sound decisions
- Comfortable wearing multiple hats
- Willing to take initiative
- Proactive, responsive, and attentive to client needs
- Excellent verbal and written communication skills
- Enjoy sharing expertise with a diverse team to encourage development and growth
- Believe in making a positive environmental impact

### **Your background**

- Bachelor's degree in mechanical engineering
- CEM, CMVP, EBCP certification preferred
- Five or more years of experience with:
  - Conducting retro-commissioning surveys to identify energy savings opportunities
  - Performing energy and economic analyses based on trending and weather data
  - Commissioning and retro-commissioning building systems
  - Trending data, BMS, measurement and verification
  - Utilities energy efficiency programs
  - Working on-site with commercial and industrial customers

Strategize • implement • Save

- Writing reports and delivering presentations
- Utilizing tools such as Microsoft Office
- Managing project scope, schedule, and budget

### **Day to day**

You will join a team dedicated to helping commercial and industrial customers manage their energy use by providing technical expertise through energy efficiency programs, training initiatives, and direct to customer services. Some of the day to day activities you would be involved with might include:

- Identifying energy efficiency opportunities
- Performing energy and economic analyses
- Reviewing energy assessments, opportunities, and calculations
- Collaborating with customers, assisting with technical questions and developing projects
- Preparing reports and delivering presentations
- Mentoring other technical team members to teach energy engineering fundamentals

### **Benefits**

We offer a full benefits package, including a health plan, dental and vision, life, a retirement plan, paid holidays and paid time off, and a competitive salary.

### **More about Energy Sciences**

Energy Sciences is on a mission to create a more sustainable and socially responsible energy future. We value working as a team, questioning the status quo to find new and better ways, doing our work with integrity, as well as taking responsibility and initiative to get things done. We provide professional consulting, training, and energy management services to commercial, industrial, and municipal sectors, delivering customized solutions and sustainable strategies.

### **Additional information**

Energy Sciences is an equal opportunity employer and all qualified applicants will receive employment consideration without regard to race, color, religion, national origin, sex, disability status, protected veteran status or other characteristics protected by law.
