

Energy Engineer Metro Detroit Area-Michigan

As an energy engineer with Energy Sciences, you will join our team of degreed and licensed engineers, scientists, and energy efficiency professionals to meet the energy use challenges of commercial and industrial facilities. We are looking for experienced and talented technical team members to assist our clients, from small businesses to Fortune 500 companies, in identifying energy-savings opportunities, reducing waste, and saving money. You will play a key entrepreneurial role on a team in an exciting, start-up environment that is dedicated to driving our vision of a sustainable and socially responsible energy future.

Your background

- Bachelor's degree in mechanical engineering required
- CEM, CMVP, EBCP, PE certification preferred
- Up to five years of experience with the items below preferred:
 - Utilities energy efficiency programs engineering support (Custom and Standard)
 - Rebate applications engineering review for commercial and industrial facilities
 - Retro-commissioning of HVAC, compressed air, and process steam systems
 - New building systems commissioning
 - Compressed air leak surveys
 - HVAC assessments to identify energy savings opportunities
 - Energy and economic analyses based on trending, bin weather data, and regression analysis
 - ASHRAE level I,II,III energy auditing for commercial and industrial facilities
 - BMS review, trending, and field measurement and verification work
 - Knowledge of buildings systems including HVAC, pumps, chilled water, hot water, steam, industrial process and compressed air
 - Working on-site with commercial and industrial customers
 - Writing reports and delivering presentations
 - Utilizing tools such as Microsoft Office and advanced skills using Excel
 - Managing project scope, schedule, and budget
 - Project management

Day to day

You will join a team dedicated to helping commercial and industrial customers reduce their energy use by providing technical expertise through energy efficiency programs, training initiatives, and direct to customer services. Some of the day-to-day activities you would be involved with might include:

- Identifying and quantifying energy efficiency opportunities
- Performing energy and economic analyses
- Reviewing energy assessments, opportunities, and calculations
- Collaborating with customers, assisting with technical questions and developing projects
- Preparing reports and delivering presentations
- Conducting site surveys and facilities assessments
- Mentoring other technical team members to teach energy engineering fundamentals
- Managing utility energy efficiency programs
- Travel time up to 25%

About you

- Collaborative, enterprising individual who likes to work in an open team environment
- Excited about challenging the status quo and offering creative ideas for growth
- Self-motivated and able to work with autonomy and independence
- Able to make quick and sound decisions
- Comfortable wearing multiple hats
- Willing to take initiative
- Proactive, responsive, and attentive to client needs
- Excellent verbal and written communication skills
- Enjoy sharing expertise with a diverse team to encourage development and growth
- Believe in making a positive environmental impact

Benefits

We offer an outstanding benefits package, including:

- Health insurance starting on day 1 of employment
- Employer paid dental and vision, life, STD and LTD
- 401K with match program beginning 1st of the month after employment

Strategize • implement • Save
